2.2	heading level 2 in the .md	2
3	another top level heading	2

1 This is part one

1.1 heading one in /main.md

Edit made on new os.

paragraph in /main.md

note the things in **parts** must be *directories* which contain a main.md. That main.md file may also have a **parts** section for including further files, etc.

2 This is part two

2.1 To do

- Closely match the appearance of my latex documents from a year ago
 - same border spacing
 - same structure, e.g. have an abstract/terminology/progress sections, bibliography/appendix etc
 - make top level headings as ‘parts’, e.g. part 1, part 2,

well let’s consider this algorithm

```
def mainko(bozo):  
    return "hungry"
```

as well as this

```
int mainko(int bozo){  
    return ERROR_UNDEF;  
}
```

2.2 heading level 2 in the .md

aaa

2.2.1 heading level 3 in the .md

bbb

todo - make the key:value thing in parts be section parts to filenames, e.g. for abstract, progress, etc?

```
a_outerfolder  
b_outerfolder  
c_outerfolder  
d_outerfolder
```

3 another top level heading
